AV. AIR CONS	391L/min 13.8cfm
AIR INLET SIZE	1/4" NPT
NET WEIGHT	1.86kg
WIDTH	54mm

This all new Shinano Torque Wrench combines the speed of a ratchet wrench with the accuracy of a torque wrench. Nuts can be tightened to torque settings between 90Nm and 140Nm accurately and are shown on a LED torque indicator on the tool. The 360° rotational exhaust allows the operator to position the direction of the exhaust where it will not be harmful or a hindrance. The SI-6000A comes in a carry case with 3 long sockets for undoing nuts on alloy wheels without damaging the wheel and a swivel joint which reduces strain on the operator's wrist. 3 AA batteries are required to operate the LED display. Designed for use on alloy wheels but can be used wherever torque control is required within this torque range.
