

CHISEL SCALERS

The Trelawny range of Chisel Scalpers is extensive. There is a tool for almost any application requiring removal of coatings, corrosion or other accumulated materials.

Chisel Scalpers are also used for brick raking, chipping, etc while the long reach models are ideal for floor scraping and cleaning as well as demolition work.

Trelawny Chisel Scalpers take a range of 12mm square shank chisels for brick raking, chipping and splitting applications. Available as straight, semi-pistol or pistol grip and a variety of sizes for many uses including weld dressing, chipping and brick and stone cleaning.

Trelawny chisel scalpers are converted to needle scalpers in seconds with the purchase of a needle holder assembly and are also available in a chisel / needle scaler kit to cover a wider range of applications with the one tool.
