

HYDRAFLEX

TRELAWNY HYDRAFLEX

The Hydrflex is specifically designed for hold cleaning on bulk carriers and cargo vessels of all sizes. This simple mechanism uses a combination of water and compressed air which results in a very powerful, tightly compressed jet of water able to reach up to 30 metres. This ensures that cleaning time is kept to a minimum without the need for any additional equipment and is easy to set up and operate. The one man operation can clean residue, flaking rust, loose paints and other substances from a ship's hold. The Hydrflex is manufactured from high quality non corrosive stainless steel which ensures a long life with a minimum of maintenance.

HYDRAFLEX

HIGH QUALITY STAINLESS STEEL – ADJUSTABLE AIR PRESSURE CONTROL VALVE

EFFECTIVE JET REACH	30m
WATER CONSUMPTION	454L/min
WATER PRESSURE	5.85BAR 85Psi
AIR CONSUMPTION	1980L/min 70cfm
AIR PRESSURE	6.9BAR 100Psi
RECOIL	10 – 18kg
WATER HOSE I.D. REQD	50mm 2"
AIR HOSE I.D. REQD	19mm ¾"
WEIGHT	14.1kg
