

POLE COMPACTORS

POLE COMPACTORS

Trelawny Pole Compactors are powerful tools for tamping backfill in and around deep guide posts and utility poles. Pole Compactors have been proved as the ideal tool for the re-instatement of materials on roads and footpaths where holes have been dug for inspection of leaks, faults and cables. Alternative compacting tools are large, heavy and often need a large surface area to work on. This leads to a larger hole than necessary being dug, resulting in more time and expense being added to the job than is necessary.

Also used in the construction industry for compacting around pipes and signposts, tamping and compacting narrow trenches being refilled and in the fencing industry for tamping around fence posts. Pole Compactors are a single operator lift and finite control of the tamping means that inspection holes can be excavated at sizes no bigger than are needed. A range of tamper feet are available to suit most applications. Pole Compactors can easily be converted to Pole Scabblers by replacing compactor foot with a scabbling head

VLLRS55

POLE COMPACTOR

LOW VIBRATION - SINGLE HEAVY DUTY HEAD

BLOWS PER MIN	1100
AIR CONSUMPTION	708L/min 25cfm
AIR INLET SIZE	1/4" BSP
WEIGHT	20kg

Aeq 3.5m/sec²

Vibration reduced model of LRS55 for added operator comfort, reduced fatigue and improved operator control.

Code: 150.5210 with 100mm square foot

Code: 150.5220 with 150 x 125mm foot

LRS55

POLE COMPACTOR

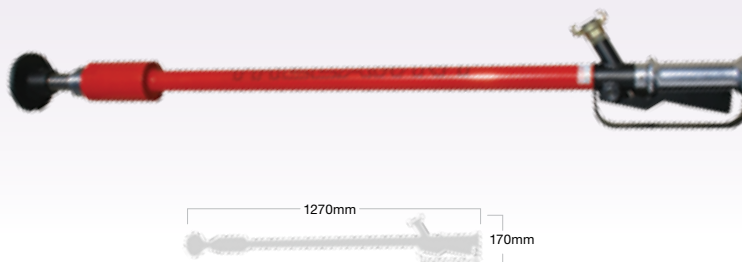

SINGLE HEAVY DUTY HEAD

BLOWS PER MIN	1100
AIR CONSUMPTION	708L/min 25cfm
AIR INLET SIZE	1/4" BSP
WEIGHT	13.5kg

Code: 150.5010 with 100mm square foot

Code: 150.5020 with 150 x 125mm foot

Code: 150.5030 with 125mm round foot

ACCESSORIES - POLE COMPACTORS

	PART NO.	DESCRIPTION	SPECIFICATIONS
	450.5001 (screw fit) 450.5011 (pin fit)	100 x 100mm Compactor foot	Standard foot for use on most tamping jobs
	450.5003 (screw fit) 450.5013 (pin fit)	127 x 152mm Compactor foot	Ideal for tamping close to walls and street fittings
	450.5006 (screw fit) 450.5016 (pin fit)	200 x 100mm Compactor foot	Mainly used for narrow trench work such as cable laying
	450.5007 (screw fit) 450.5017 (pin fit)	127mm diameter Compactor foot	Used for general compacting work
