

## PORTABLE MIXING UNITS

### HIPPO PORTAMIX

The Portamix Hippo is the mixing station for all flooring and coating specialists. The Portamix makes the mixing and placing of a wide range of construction compounds much easier, faster and safer. This new patented concept was developed as a result of a huge demand for a product that would mix and pour large quantities of compounds thoroughly, efficiently and quickly and at the same time reduce injuries such as back strain and other OH&S issues.

The Portamix will efficiently mix 80 litres or 130kg which is 5 x 20kg bags of compound plus water. Floor levelling compounds, gypsum, cement screeds, render products, slurries, epoxy self levellers, grout, mortar, texture coatings, sealants, adhesives and many other pourable and high slump materials can be mixed efficiently and without mess while reducing labour and physical effort. Even materials containing decorative aggregate or stone chip are mixed with consistency due to the combination of the mixing canister and helix design. One flooring contractor has reported his well spent investment in a Portamix has meant some 3 man jobs now only take 2 and some 2 man jobs now only take 1 which not only increases productivity but substantially increases profits. Often multi-stage pours now are no longer necessary. The development of the Portamix involved a lot of research and testing to come up with a unit that would not leave unmixed pockets of compound, would pour easily into smaller containers or direct onto the floor and be easily manoeuvred on building sites. The balanced easy-tilt cradle allows accurate placement of material and the easy-roll mobility lets you pour and spread flooring compound at the same time. Flooring contractors, plasterers, painters, waterproofers, tilers, concreters and many other trades and industries all prove the benefits of the Portamix.

The Portamix is available in 2 models, one is for flat floor pouring and the second for rugged building site pouring.

A range of paddles is available for different compounds. The 2 speed electric motor is standard but a pneumatic option is available. The Portamix is not to be used with inflammable products.

### EM 125 S

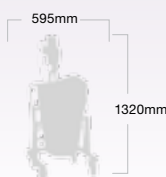

#### PORTABLE HAND MIXER

ELECTRIC / LIGHTWEIGHT / VARIABLE  
STAGE TRIGGER

MOTOR	1100W 1.4HP
SPEED	0-450rpm
WEIGHT	4.4kg excluding paddle

Powerful, lightweight mixer for smaller jobs. Wide choice of paddles for many applications and paddle design ensures minimal splashing.

### PMH 70F

#### HIPPO PORTAMIX F - SERIES

ELECTRIC / 4 CASTORS FOR FLAT  
FLOOR POURING

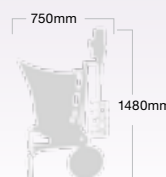

BOWL CAPACITY	80L 130kg
MIXING PADDLE	TW200D large dual helix
MOTOR	1800W 2.4HP 2 speed
PADDLE MOUNTING	Reversible for "alongside" mixing
WEIGHT	44kg

The 'F' series Portamix is designed for floor coatings, allowing the contractor to dispense the material directly on to the floor, moving the Hippo around with ease to spread as dispensing.

PMH70F Pneumatic model with 1641W 2.2HP air motor also available. Ideal for wet and inflammable environments.

### PMH 70X

#### HIPPO PORTAMIX X - SERIES

ELECTRIC / 2 LARGE WHEELS FOR  
RUGGED BUILDING SITE MIXING

BOWL CAPACITY	80L 130kg
MIXING PADDLE	TW200D large dual helix
MOTOR	1800W 2.4HP 2 speed
PADDLE MOUNTING	Reversible for "alongside" mixing
WEIGHT	45kg

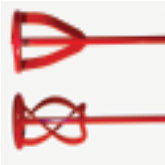

The 'X' series Portamix features 2 large wheels for easy manoeuvring over rough ground and stands higher off the ground so material can be easily decanted into buckets placed under the pouring spout.

PMH70X Pneumatic model with 1641W 2.2HP air motor also available. Ideal for wet and inflammable environments.

## PORTABLE MIXING UNITS

### ACCESSORIES - PORTABLE MIXING UNITS

M14 PADDLES	PART NO.	LENGTH	DIAMETER	APPLICATION
	TF120 TF140	700mm 700mm	120mm 140mm	Thin liquids and paints.
	TR120 TR140	700mm 700mm	120mm 160mm	Steep mixing blades for levelling compounds, bitumen coatings, paint, grouting compounds and spreading compounds.
	TM120 NEG TM140 NEG	700mm 700mm	140mm 160mm	3 blade paddle forces material from top down. For dispersions, paints, plasters, gypsum lime and mortars.
	TM120 TM140	700mm 700mm	140mm 160mm	3 blade paddle forces material from bottom up. Plasters, paste granules, slurry resins and epoxy.
	TW120 TW140 TW200	700mm 700mm 700mm	140mm 160mm 200mm	Plasters, concrete mortars, resins and tile adhesives.
	TW200D	700mm	200mm	Self-levelling compounds, screeds, paints, plasterfill and epoxy. Double helix for use within the Hippo Portamix.
PLAIN SHAFT MIXING PADDLES FOR DRILLS - SUIT ALL 13MM CHUCKS				
	PKR80	400mm	80mm	Thin liquids and paints
	PL90	500mm	90mm	Paints, thin liquids and adhesives. Best at high speeds.
	PR120S	590mm	120mm	Paints, spreading compounds, bitumen coatings and grout.
	PM120S	590mm	120mm	Plasters, paste granules and epoxy.
	MJ130	590mm	120mm	Adjustable fins to suit quantity. Ideal for plaster and mortar.
PADDLE ADAPTORS	PART NO.	SIZE		
	484292	M14 / 1/2 x 20		
	483944	M14 / 13mm HEX		
	DCM14	M14 / 12mm dia.soft		
	49500	M14 / 1/2 x 20		
	49502	M14 / 5/8 x 11
